1R8 GKM Correspondence Tracker Users 20151014.xlsx

The correspondence tracker was created as a tool for both EPA and ICP Agency Administrators to be able to have intelligent conversations regarding discussions with residents and their private drinking water well results. No residents have access to the tracker.

You can contact either Ping Wang or Kris Fuller to have someone added to have access to the correspondence tracker after I leave.

Subject: GKM correspondence tracker origins

Jamie Miller recommended contacting you about this. Some questions have come up here (the R8 Denver office) about the application, who owns & administers the application after Dave Kappelman de-mobilizes from site. As part of that, it would be useful to pin down who requested Correspondence Tracker, any application requirements GKM Correspondence Tracker is supposed to meet, any promises made to external partners related to the Correspondence Tracker. If you have any of that, please send it on. If its easier to explain the background by phone, give me a call.

[Jamie appears to be enjoying R8 so far. I've been doing what I can to help her settle in.]

Dave Christenson,

ESAT & Superfund Records contracts Project Officer
